FROM COW TO CRADLE HIGHLAND BRAND EVAPORATED CREAM

is safeguarded by every possible precaution to insure highest quality, purity and absolute cleanliness. This is accomplished by using the best of cow's milk, from model dairy farms, under most careful inspection and supervision. This raw milk is sterilized and evaporated down to a cream-like consistency by our special process, which causes the casein to coagulate in a flocculent form when taken into the stomach, thus making it more easy of digestion than raw milk. . . . Peddled milk, as supplied in most cities and towns, is unsafe as a food for infants. It is irregular in composition, often adulterated, and generally swarming with pathogenic bacteria.

Highland Brand Evaporated Cream is of uniform composition, easily digested and assimilated and absolutely germ free. It is the simplest, yet the most complete substitute food for infants. Always ready. Just dilute with water and give to baby.
